

SG-2D

Functions And Features

- Made from Aluminum alloy, 304 stainless mirror reflector and special material
- Applying to drying the painting work for spot damage from the car body, avoiding the heating up the whole spray booth which highly reduce the cost.
- Suitable for drying the spot damage under one area of three panels.
- Unique electronic timer, digital control system for half-power or full-power optional, Each emitter can be independently controlled.

Technical Parameters	
Type	SG-2D
Input Voltage	1PH220V
Frequency	50Hz/60Hz
Rated Power	2KW
Adjustable Height	250-1200mm
Preheating Time	1-5min
Drying Time	1-15min
Curing Distance	600-800mm
Working Current	5-10A
Curing Temperature	60-70°C
Curing Area	800*800mm
Dimensions	500*750*1650mm
Short Wave	2.1μm
Weight	28kgs

Curing Time Reference	
Process Project	Set time
Primer Anti-rust Coating	10min
Putty	10-15min
Undercoat	5min
Intermediate Coat	5-10min
Finishing Coat	5-10min
Varnish	10-15min
